**Experience Using a Novel 45 Degree Transducer to Develop a General
Unconventional Shale Geomechanical Model**

Speaker: Richard Rosen

Thursday, November 10th 2016. 12:00 PM @ Marquez Hall, Room 108

Richard Rosen will be talking about a novel method of obtaining geomechanical measurements in unconventional shale reservoirs. He is a petroleum engineering consultant who worked for Shell for 30 years.

Chick-fil-A will be provided! We hope to see you there!
